Misguided Memorialists.

New York, Yarch 14.—Dr. Sameon fathered a memorial to congress which was quite numerously signed yesterday by Baptist ministers at their conference at No. 2 Marray street, the purport of which is to oppose the bill now before congress prohibiting or limiting Chinese immigration. The memorialists say that the country needs the labor of the Chinese; that they are as a people quiet and includes; that under the constitution they have a right to come here on the same terms as other immigrants; that it is contrary to our constitution and the spirit of our government and laws to permit them to come or stay here as bond servants for terms of years, however limited; and that all restrictions applicable only to Chinese should be obliterated from dar statute books. Cultiformia Crop Notes.

San Francisco, March 14.—The Bulletin of this evening has the following on the prospects of the wheat crop: Late rains have done much to improve the condition of crops and inspire renowed confidence in a large yield. It is known that there is over 3,000,000 acres acceded to wheat this year; about 700,000 acres to bariey; 35,000 acres to oaks: 145,000 acres to corn, shd 165,000 acres to rya and besins. Rains for the past few days have been quity general and are conceded to have been the most benefit of the season. It is now a common remark that al and are conceded to have been the most benea-cial of the season. It is now a common remark that the crop is assured. Of course all contingencies have not been passed, but the experience of other years justifies the hope and belief that we shall have good crops during the enading summer. Pos-sibilities are fastering while probabilities are co-couraging. It should be remembered that with the exception of last year we were never so well fixed on the wheat question at this season as now. Never natil last year did we go into this month with so much on band. It is fair to say that there was over 500,006 tune of wheat in the state, on the laf inst. Three years ago this along would have been consid-500,000 tons of wheat in the state on the latinat. Three years ago this alone would have been considered a good exportable surplus for twelve months. Even admitting that we do not produce ever 1,000,000 tons surplus next ammer, thus would give 1,500,000 tons for export for the next twelve months, which is a much larger quantity than has been exported in the past twelve months. Outside of wheat, however, the business outlook is more conventional than the past twelve months.

San Francisco, March 14.—The crew of the ship datherer, which recently arrived at Wilnington from Antwerp, have brought complaint against Cupt. Sparks, their mate Yutts, and second man Caph. Sparks, other mate watts, and second mate Curtis, alleging a series of almost incredible about the sperperniced on the crew. A Pittable State of Affairs.
Officers and passengers of the stramer City of Baton Rouge, which arrived here to-day from Now Orleans, say the condition of things along the whole length of the river is pittable in the extreme. The riger they say, has an average width of forty miles nearly all the way from Caire down, and with the exception of some sixy miles above and below Vickeburg, the levees are either washed away or covered with water, and of no practical benefit. Thousands of people have been driven from their homes and nearly sit their live stock has been or will be starved or drowned. will be starved or drowned.

Advices from above couldrn the reported break of Faise river dyke Saturday night and some damage to planta-tions in Woot Baton Roung may result. The river at Vicksburg yesterday rose 3 inches, the flood of wat-ers from the Yazoo valley having reached that point. Arrangement is being made by commissioners for the distribution of 160,250 government rations, those for the upper cosat to be sent by steamer on Tuesday.

Vicusiwas, March 14.—Delta, La., has been aban doned to the flood and people are leaving it as fas Graut's canel, resulting in perfect distruction to that town, and complete abundonment of Vicksburg as a river-town. A committee of citizens from Delta are soliciting subscriptions from merchants here for protection of this leves, and are meeting with literal response. Complete ruln is reported on Sundower river, Deer creek and Begue Eulalie.

The Seamer Sandower arrived to-day from that stream with an immense quantity of slock, people and plunder. Some plantations are five feet under water, others not less than two and only here and there can a dry spot be found. All is an immense waste of water. Among the poerer classes there is considerable suffering reported and those who are able are leaving the country. At John sourtile the river lacks about three feet of reaching the high water marks of 1867, while below at Shell. Below and ter marks of 1867, while below at Sheil Ridge and Woodburn it lacks only about twelve or thirteen inches. The captain of the Sunflower is of the optimion that the water will receds in time to mable the ion that the water will receio in time to enable the farmers to plant an average crop. Big water is nouring out of Yazo river, which has backed about thirty natirs up from the Mississippl and now threatens the whole section of the country and continues to Mitthen's Rend and Goodrith's, Ben Lomond and Alastia. When the steamer passed there this moreting the imbabitants were working with all their might to protect the levee at Millikon's lend, which it is supposed on not be held, there were which it is supposed can not be held infact much longer. Nearly all the plantations at Lake Washington are submerzed and nearly two-thirds of the stock in that section of country is estimated to be lost.

KENTUCKY IS REDISTRICTED BY THE BOURHON.

Vescers Caty-Aurosities of the Assessment Cotters of Voters.

Louisville Correspondence of the Chicago Tribune. The constitution of Kantucky provides that once in eight years there must be a realistricting of the state for legislature purpass. The last reapportionment was made in 1873, and honce the time has arrived for another one. The committee appointed at the present session of the legislature to formulate a bill for this purpose has been engaged on the work for some time, and this week, having completed its labors, the matter comes before the legislature.

Some very startling facts concerning the methods employed in frauding the hill have leaked out through a member of the committee, and it has now been ascertained beyond all question that the democratic reapportionment committees, both this year and in 1875, have arrayed thouselves in direct contact with the constitution of the United States and deprived the colored voter of any representation wintever in redistricting the state, basing the reapportionment on the number of white vector only. The first reapportionment after the colored man become a voter was in 1873, when the committee acted under the provisions of the state committee acted under the provision of the state committee acted under the provision of the state committee acted under the provision of the state committee acted under the state two years.

Section 8. Every free white male efficien of the age of 21 years who has resulted in the state two years.

COUNTIES ALLOWED ONE SEPRESUSTATIVE Breckiurldge... COUNTIES ALLOWED TWO REPERSENTATIVES.

From this it will be seen that Warren county, with a total white and colored vote of 6058, and Davies, with a total of 6030, were allowed tro representatives each, while Christian county, with a total white and colored vote of 6533, is allowed only 1. Taking Warren county, the malies to which 2 representatives are allowed, it will be seen that the countity with 4068 white volors, comes nearer under this pian than Christian, but Ohlo and Christian countity are representation. The colored population of Christian county is 14,639, all of whom are totally deprived of representation. This, it must be reincombered, is in the United States, where the constitution guarantees the right to vole to every male citizen of over 21 years of age.

But there is smother stand-point from which a study of this apportionment bill gives interesting results. While the bourbon committee has refused an experised to the other control of the colored votes of the state, it seems that the assessors of the various counties have not been the less energetic in making as reasgerated.

The secretary te regraphed Licut. Harbor directing this to the colored voters. Of course the objects sought in the two cases are cliamed-rically opposite—the less surposition to consumence Nose. From this it will be seen that Warren county with catimate of these same colored voters. Of course the objects sought in the two cases are dismetrically opposite—the legislative bourbons wishing to exclude republicans from the senate and house, while their assessing brethren, who are allowed fifteen cents per name for all the votes they can rake up, being anxious to make as heavy a showing as possible. The auditor's report of the number of legal voters in the state was the basis upon which the committee was aumused to have usede the committee was supposed to have made the respicationment. That it did not use all of it is no fault of the auditor and no fault of the assessors,

who, urged on by the prospect of getting IScenis per name, have discovered that Kentucky has the most remarkable voting population in the Litted States. The largest vote ever cast in the state was that of 1880, when the contest was non-maily here in every congressional district, and every able-bodied roter was empressed to have voted. Of course, there are always stay-at-homes, which may be estimated at one-lanth of the outire number of voters. ing for several years, but not until recently nel is liable to again prove a source of trouble was the cause discovered. Although the damping of street refuse or matter of any kind in the harbor is strictly prohibited by law, it has that the old canal has now been utilized by the been done stealthily for a long time and the river to such an extent, that citizens of Vicksresult is a matter of course. Deposits have burg are alarmed lest the whole course of the already made the channel so shoul at several river be changed into it, and their city be left points as to seriously inconvenience commerce. The claudestine practice was discovered by a vigilant harbor inspector who tells the story the church establishments of Great Britain ap-

in the Times.

I got wind of the fact that the scows taking the mud away from the new Pannayivania railroad dock were rarely away long enough to have dumped their loads out at sea. The same afternoon that I keerd loads out at sea. The same afternoon that I keerd loads out at sea. The same afternoon that I keerd loads out at sea. The same afternoon that I keerd loads out at sea. The same afternoon that I keerd loads out of the sea of the load of the westher was favorable, and I could see no reason why they should not have been towed out to sea at once. I investigated further and learned that the captain and owner of the tog employed to dump the captain and owner of the tog employed to dump the savonat out he salonas in Jersey City and bosating in a mysterious way that he kad "strack a gold mine." I knew at once the nature of his mine, and I proposted to ascertain its location. I hired a tag boat, and as darkness set in, I approached the Pennsylvania dock. The tug boat employed to do the damping soon put out into the stream with the three scows in tow, and hoaded to ward the Narrows. My tug boat followed cautiously in order not to awaken anapticion. When midway hetween Pleru 3 and 4, North river, end the Robbin's reef lighthouse, all three of the scows were dumped in the very middle of the main ship channel. I reported the facis to the pilot commissioners, and proceedings have been began against the captain of the grant with the doct of the mine ship channel. I reported the facis to the pilot commissioners, and proceedings have been began against the captain of the grant with the doct and brought beet configured that a tugboat and kept watch. The night was inc and clear, and scows could easily beet towing two large scows full of mind put out from the excavations in Govanna bay. Instead of steaming bodity out into the bay, the tug kept close to the alone mill, near the Eric basin, when sho bedded out, into the stream with the scows. This was a tug-base tower in the sea of the stream in the sea of the stream with t

Under cover of the darkness it watched these toom and saw them domp their contents in the main this channel, near Oyder Island. After I seeds these I went in to Ambrose & Co.'s tug and mailed the expisite. I seked him why he wanted to rain the harbor in last way, and why he had presented to come but of the Eric basin instead of Gowans bay. "Why," said to him, "I wish I had a biander bruss here is blow you out of the water for what you we done." Mot only the capitain of that tug, what you we done." Mot only the capitain of that tug, and the contractors who own her, will be first as heavily as the law will permit.

A Sen Francisco paper in commenting on this discovery says that San Francisco bay is the common dumping ground for that city and that hundreds of tone of garbage and dirt are thrown into it each year. The tide is not suf-Sciently strong to carry it to sea, and it setthe and is slowly alling up the channel. Debels from the placer mines on the upper Sacramento and Feather rivers also settles in the hay and with the rofuse from the city threatens Baymills along the Willamette and Colum-

his formerly dumped the dust from their saws into the river until the hers were perceptibly affected and a law was ensoted to prevent it. A large questity of sales thrown into the Wilassette near the steamship dock once, raised the ridge at Swan laland more than eleven notes and brought out a protest from Col. Wilson, the United States engineer. There is no necessity for designing refuse matter into the river here and the law probibiting it should not be illowed to become a dead letter. THE BURDENSOME TARIFF.

A. Wells mosnily lectured on the tar if question in New York making some statemants of very great interest. The people of the United States, he said, are divided into two channes, the one class consisting of a small consecuty who directly or indirectly claim to be beautied by the atnormal prices given them by a productive term, and the other, the vast majority, who, instead of being benefited by ate special bounds, are oppressed and burby it. Numerically these classes stand tionstaty £,000,000 protected and 40,box-protected and plundered. As prothat as disproperties to. have not deserved scorn. I presume I have been silly, though. That is the bitterest thing about it. I have never boken rules to go driving or to spend long afternoons down the bay, or do things peculiar to the "fast" set here. I know I have whispered at lectures and firted continually, but it has been mostly under the teachers' eyes.

I amile to think how I am fretting. This will soon fade, and I have many triumphs. My

tention from people. The professors say the kindest things. Won't all this weigh down that bit of trouble.

But I never ment the praise, and I know it averages are read in my class and confess my trickeries. There would still be some hard work at the bottom I should not be quite at more I shall nover respect myself till I am brave enough for such things, and "Too scop, too scop, the noon will be the afternoon, too acon to-day be yesterday."

Afternoon—I have had a talk with Kate Erskine. It was so pleasant at noon that I asked her to walk. We went along by the gardens

her to walk. We went along by the gardons and tamarisks. Shadows must fall, I suppose, for presently we met that drawing teacher. I bowed very slightly indeed, and felt so vexed—so vexed I showed it. Kate broke in upon matter, I told her, and we went on, but her face betrayed her struggle, and seen her great eyes met mine keenly
"You have heard something unpleasant?"
"Yes, I have." I broke out "Miss Tracy is

She has a sweet face and glorious eyes, greatly ad-mired by every one. Somehow she looked helpful, too, just then. I felt as if every man's hand was against me. I told her, and I might as well have the game as the name, you know "Yes, I know," she interrupted, "I have falt just so. It's a false way to think But ex-

FARM AND GARDEN.

1 sade near Cloverdale Somma counts. They are expecting in a few days a large quantity of fruit trees and grape vines from Italy, which they will also set out this season.

The American Wounder pos vine exidently grows in favor with years. It is of the first quantity, oarly half dwarf and prolific. It grows to the height of a foot or more and the pens mature at about the same time as the Little Grom, which variety it closely resembles. The peas are wrinkled, sweet, tender and delicious.

For a drooping plant for the window galden Chhoma crassifota is good. This is a pietty plant of or coping habit, bearing a attiking resomblance to some species of Sedmas. The leaves are fleshy and of a light given color. It flowers profusely, the flowers are of a bright yellow color, and about a counter of an incharge across. It is, moreover easily cultivated.
